

CERTIFIED INFORMATION SYSTEMS SECURITY PROFESSIONAL (CISSP)

Cairo - Egypt
01 - Feb 2026 - 05 - Feb 2026
\$4,500

GENTEX[®]
TRAINING CENTER

Introduction

Information security plays a critical role in the protection of digital assets, business systems, and personal data across all industries. As cyber threats evolve and regulations tighten, organizations need trusted professionals with broad knowledge and hands-on experience in security management, architecture, and operations. The Certified Information Systems Security Professional (CISSP) course by Gentex Training Center equips professionals with the comprehensive understanding and strategic insight to design, implement, and manage a secure business environment.

This specialized course in information security addresses real-world scenarios such as access control, password policies, user rights management, and the enforcement of security governance. Participants will learn the essential practices for protecting systems, managing authorization, handling encryption, monitoring threats, and responding to incidents efficiently.

Whether you work in government, finance, healthcare, or the private sector, CISSP prepares you to lead information security efforts confidently and responsibly.

Certified Information Systems Security Professional (CISSP) Course Objectives

- Understand the principles of information security and risk management.
- Design security architectures and enforce access control mechanisms.
- Implement security policies, password policies, and privilege management frameworks.
- Address software development security issues and threats.
- Manage security operations and apply disaster recovery techniques.
- Navigate legal, compliance, and ethical issues in information security.
- Identify and respond to evolving cyber threats and vulnerabilities.
- Apply secure communication protocols, cryptography, and asset security measures.

LEARN BOLD. LEAD BEYOND

GENTEX Training Center LLC | Orlando - FL, USA
Info@gentextraining.com

- Lead incident response, auditing, and business continuity planning.
- Promote a culture of security awareness and responsibility.

Course Methodology

Gentex Training Center uses a blend of instructor-led sessions, interactive discussions, case studies, and scenario-based exercises. This hands-on approach ensures participants gain both theoretical knowledge and real-world application.

Who Should Take This Course

- IT Security Managers
- Network Administrators
- Systems Engineers
- Risk and Compliance Officers
- Cybersecurity Professionals
- Government IT Officers
- Information Security Analysts

Certified Information Systems Security Professional (CISSP) Course Outlines

Day 1: Security and Risk Management

- Introduction to CISSP Domains
- Principles of Confidentiality, Integrity, and Availability
- Governance and Compliance: Regulations, Standards, and Frameworks
- Information Security Policies and Procedures
- Access Control, User Rights, and Permission Management

LEARN BOLD. LEAD BEYOND

GENTEX Training Center LLC | Orlando - FL, USA
Info@gentextraining.com

- Risk Assessment and Risk Treatment Strategies
- Business Continuity and Disaster Recovery Concepts

Day 2: Asset Security and Security Architecture

- Asset Classification and Ownership
- Privacy Protection and Data Handling Requirements
- Security Architecture Design and Evaluation
- Security Models and Frameworks (e.g., Bell-LaPadula, Clark-Wilson)
- Virtualization and Cloud Computing Security
- Secure System Lifecycle and Security Control Selection

Day 3: Security Engineering and Communication Security

- Cryptographic Systems and Public Key Infrastructure (PKI)
- Secure Network Protocols (SSL/TLS, VPN, etc.)
- Wireless and VoIP Security
- Physical and Environmental Security Controls
- Security Vulnerabilities in System Design
- Preventing Data Leakage and Communication Attacks

Day 4: Identity & Access Management and Security Operations

- Identity and Access Management (IAM) Lifecycle
- Multi-Factor Authentication and Federated Identity Systems
- Password Policy Management and Enforcement
- Monitoring, Logging, and Auditing
- Security Operations and Incident Management
- Forensics and Investigative Procedures
- Patch Management and Vulnerability Scanning

Day 5: Software Development Security and Review

LEARN BOLD. LEAD BEYOND

GENTEX Training Center LLC | Orlando - FL, USA
Info@gentextraining.com

- Software Security Risks and Secure Development Lifecycle (SDLC)
- Security in Agile and DevOps Environments
- Threat Modeling and Code Review
- Input Validation and Secure Coding Practices
- Penetration Testing and Application Security
- Final Review and Case Studies
- Developing a Security-Centered Culture in Organizations

Conclusion

By successfully completing the Certified Information Systems Security Professional (CISSP) course with Gentex Training Center, participants will gain the knowledge and confidence needed to manage organizational security challenges and safeguard sensitive assets. The course empowers professionals to apply their learning directly to critical information security areas, including access control, user rights policies, password protocols, and broader enterprise security strategies. This training is part of our specialized courses in information security and serves as a foundation for professionals who aim to lead secure digital transformations.
