

STRATEGIC THINKING, ANALYSIS & BUSINESS PLANNING

Doha - Qatar

15 - Mar 2026 - 19 - Mar 2026

\$5,000

GENTEX[®]
TRAINING CENTER

Introduction

Strategic thinking and business planning are essential capabilities for any organization aiming to achieve long-term success and sustainable growth. This intensive 5-day training course empowers professionals to develop the mindset, tools, and techniques necessary to assess complex environments, identify opportunities, mitigate risks, and craft clear, actionable business strategies. Participants will learn how to analyze internal and external dynamics, align planning with corporate objectives, and drive informed decision-making. Through a blend of theoretical frameworks and practical applications, this course ensures participants can think strategically, assess trends, prioritize resources, and translate analysis into effective business planning. Whether you are leading a team, managing a department, or contributing to cross-functional initiatives, this program equips you with the knowledge to create competitive advantages and strategic alignment.

Strategic Thinking, Analysis & Business Planning Course Objectives

- Understand the core principles of strategic thinking and their application in business environments.
- Conduct effective internal and external environmental analysis using SWOT, PESTLE, and competitive analysis frameworks.
- Align strategic objectives with organizational mission, vision, and long-term goals.
- Apply structured thinking models to solve complex business problems.
- Formulate strategic plans based on data, trends, and performance indicators.
- Build integrated business plans with clear objectives, timelines, and measurable outcomes.
- Enhance organizational resilience and agility through proactive planning and risk management.
- Translate analysis into decisions that support innovation, growth, and operational excellence.

Course Methodology

This course uses a blend of instructor-led presentations, case studies, group discussions, business simulation exercises, and planning workshops to enhance learning and practical application.
